About the guide

- This quick start guide is for reference only. Small differences can be found in the user interface.

- All designs and software featured in this manual are subject to change without notice.

- All trademarks and registered trademarks mentioned in this manual are the property of their respective owners.

- For more information, visit our website or contact a local service technician.

- If you have a question or disagree with something, check out our final explanation.

Step 4

Wait for the boot to finish and then the camera indicator will blink green.

Step 5

Perform the following operations to finish adding the camera.

Note: ● If you have more than one camera, do step 5 to add them one at a time.

● If the Wi-Fi network has changed or the status of the indicator is not correct, restart the camera and then follow step 5 to add it again.

Adding Alarm Sensor

Note:
- The alarm sensor is not included by default; purchase must be done separately if required.

- There are two ways to add an alarm sensor.

Method 1

Step 1 Press the Camera's Pair / Reset button for 2 seconds to enter pairing mode, then the green light will blink.

Step 2 Press the pairing button on the alarm sensor and the indicator light will flash rapidly and continuously.

Step 3 The green light on the camera will stop flashing if the pairing is successful; the red light will blink if the pairing fails.

Method 2

Scan the QR code on the sensor with the Imou app and then follow the guide in the app to use it.

Camera Installation

Note: Make sure the installation surface is as large as strong enough to support at least three times the weight of the device.

- Installation surface
- Positioning scheme
- Taquete
- Mounting plate
- Bolts
- Camera

Step 1 Drill screw holes in the mounting surface as shown in the positioning drawing, and then install the expansion bolts.

Step 2 Attach the mounting plate to the mounting surface with the self-drilling screws.

Step 3 Attach the camera to the mounting plate, turn it on, and then adjust the lens to the ideal angle.

Quick Start Guide
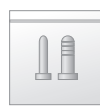

Version 1.0.0

1.2.5 1.32.15693-000

Packaging List

1 Camera

1 Power cord 1 Power adapter

1 QSG

1 Pack of Screws

1 mounting plate

1 Scheme of positioning

Camera Introduction

Lens

Built-in microphone

LED

LED indicator

Micro SD card slot

Integrated loudspeaker

Ethernet port

Power port

Reset / Pair Button

Note: Press the reset / pair button to enter pairing mode.
Press and hold the reset / pair button for 10s to restart the camera.

The following table shows the various LED light status indicators and their meanings.

Status indicator LED	Device Status
Off	• Off / LED off • Reboot after reset
Steady red light	• On • Device malfunction
Flashing green light	• Waiting for the network to appear • Enter pairing mode
Steady green light	• The camera is working properly
Flashing red light	• Network connection failed • Pairing failed
Green and red light flashing alternately	• Firmware is being updated

Operation With the Imou app

Step 1

Please scan the following QR code or search for "Imou" in Google Play or App Store to download and install the Imou application.

Note: If you installed the application, update it to the latest version.

Step 2

Launch the Imou application and then register an account to use it for the first time.

Step 3

Connect the camera to the power source with the power adapter.
